## **SN 1482 - Enumerators Returns for County Antrim, 1851**

### **Data and documentation notes**

- The original data file contained no fieldnames so these were added to the current data file using the coding sheet provided by the depositor. In the documentation the coding information is divided into cards with the variable 'schedule number' repeated in cards 2 and 3 for the purpose of record linkage. This structured was mirrored in the original data file, so when this data file was exported into the current format, the additional columns where 'schedule number' appears were deleted.
- The coding sheet, along with other information/documentation for this dataset have been scanned and saved in the file 'documentation.pdf'
