## 9 MIXING

### **MxIntro**

The next question asks about whether you have mixed socially with other groups of people in different areas of your life. By "mixing socially" we mean mixing with people on a personal level by having informal conversations with them at, for example, the shops, your work or a child's school, as well as meeting up with people to socialise. But don't include situations where you've interacted with people solely for work or business, for example just to buy something.

INTERVIEWER INSTRUCTION: IF RESPONDENT ANSWERS "DON'T KNOW" OR "NOT SURE", CODE AS NO.

## **Citizenship Survey 2007-08 Q1234 Data User Guide**

### **Selecting cases for analysis**

#### ***Core and boost samples***

The data file contains both the core and the boost samples, identified by the variable SAMPTYPE where 1=Core, 2=Focused Enumeration (FE) and 3=Screening. The FE and Screening sample types are the boost sample. The majority of analyses will use the core sample only.

#### ***Individual quarters***

The dataset contains cases for Q1, Q2, Q3 and Q4. If only one of the three quarters is required, select Q1, Q2 or Q3 cases using the Quarter variable.

### **Weighting**

There are four different weighting variables for the dataset

- WTCINDS- Core sample adult weight
- WTFINDS- Combined sample (Core and Boost) adult weight
- WTCHHDS- Core sample household weight
- WTFHHDS- Combined sample (Core and Boost) household weight

#### ***Weighting for individual quarters***

In addition, there are four weights for each of Q1, Q2, Q3 and Q4 separately. The variable names for the individual quarters are as follows, prefixed with either Q1, Q2, Q3 or Q4 (they are also labelled in the dataset):

- WtCIn Core Individual
- WtFln Combined individual
- WtCHh Core household
- WtFHh Combined household

### **Missing values**

Missing values are generally indicated by:

- 1 = Schedule not applicable (not routed to question)
- 8 = Don't know
- 9 = Refused

In most cases these have been set to missing using the MISSING VALUES command in SPSS, so will routinely not appear in tables or frequencies.

### **Additional & derived variables**

Please see the separate list for details of the derived variables.
